CHANDUBHAI S PATEL INSTITUTE OF TECHNOLOGY (CSPIT),
CHARUSAT
WEEKLY REPORT

Week No: 01 Date from: 16/02/2025 To 03/03/2025

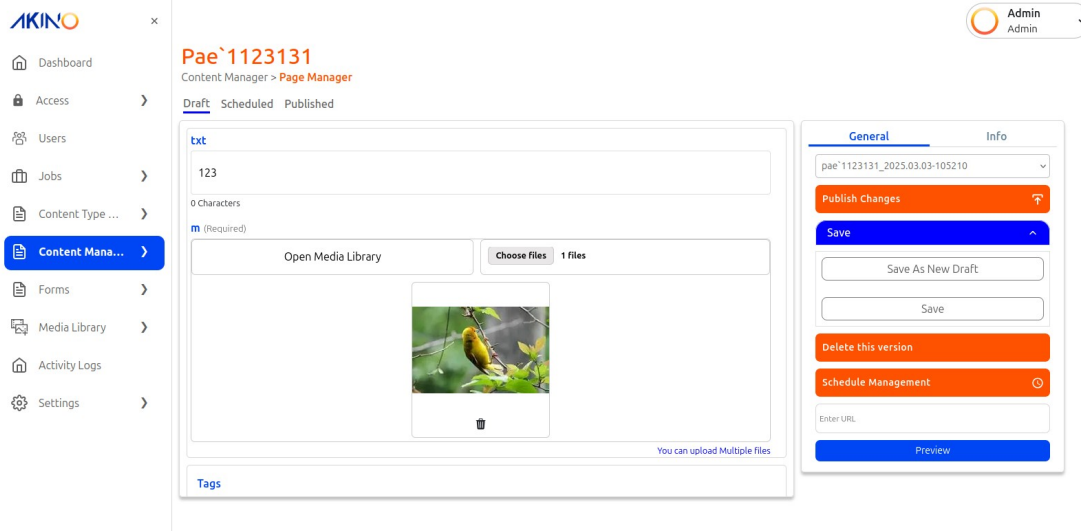

Student ID: D22CE176 Student Name: Jayur Pithava

Project ID:

Project Title:

Work Done in last week (Attach Supporting Documents):

- In last two weeks, I was working on a feature that allows user to create drafts of current page in Akino Curate. Akino Curate is a headless content management system.
- Feature was finally ready for testing and I solved various bugs in it.

- In this image we can see that user can change to three sections. Draft, published and Scheduled. Other than that, user can also select different version from the drop down on the right side.
- I was also working on another feature that allows user to upload media from media library. Media Library is a section in Akino Curate where user can upload different Media or files.(Similar to cloud).
- This image also shows a button which can be used to open media library and select assets from it.

Reason for Incomplete Work / Comment by guide

No pending work

Comment: Explore new learnings and implemented them.

Plans For next Week:

- In next week, I will keep working on Bugs and Change Requests received from the QA team.
